

Greenbrier High School Fine Arts Building

GREENBRIER PUBLIC SCHOOLS, GREENBRIER, ARK.

THE GREENBRIER HIGH SCHOOL FINE ARTS BUILDING IS designed to provide a learning environment comparable to most universities.

As a performance hall for the Drama Department, the building was also designed as a theater, each space introducing the next. The curved exterior walls and multicolored glass façade lead people to the building entrance. The main

entrance takes the traditional role of the theatrical chandelier and changes it into a piece that is passed through instead of underneath. The pattern of the lobby's terrazzo floor mimics the acoustic ceiling clouds above. This pattern also directs the attendees to one of the three entrances to the theater space. Upon entering the 900-seat auditorium, the space opens and directs attention to the stage. The

shape, size and material composition of the walls and the ceilings have been meticulously designed for optimum acoustics.

As a band facility, the building contains a large band room, the director's office, instrument repair and storage, and uniform storage. The choir function of the building includes a vocal room, a library, a practice room and two offices. Great attention was given to the design of the walls as sound barriers between the sound-sensitive spaces. [FDS](#)

PROJECT INFO

CHIEF ADMINISTRATOR	Scott Spainhour
COMPLETION DATE	Dec. 2011
GROSS AREA (SQ. FT.)	27,830
PER PUPIL (SQ. FT.)	30
CAPACITY (STUDENTS)	900
CURRENT ENROLLMENT	N/A
SITE SIZE (ACRES)	5
COST PER STUDENT	\$6,969
COST PER SQ. FT.	\$225
TOTAL COST	\$6,538,712
